COLUMBIA UNIVERSITY GSAPP

Teaching Assistantships Held:

Techniques of the Ultrareal / Imagining the Ultrareal [Fall 2013- Spring 2014]

Professors Joseph Brennan and Philip Crupi

This class teaches techniques and strategies to employ photorealistic rendering as a design tool.

Architectural Drawing and Representation II [Spring 2013]

Professors Laura Kurgen, Jessica Leung, Luc Wilson and Reinhold Martin

ADR2 is designed to integrate the GSAPP curriculum with reference to History and Theory, Visual Studies and Core Studio 2. Responsibilities include individual and juried critiques, presenting video and lecture tutorials, leading discussions.

Architectural Drawing and Representation I [Fall 2012]

Professors Josh Uhl and David Fano

ADR1 investigates the concepts, techniques and working methods of computer aided 'drawing' in architecture. Responsibilities include teaching CAD/CAM software to first year graduate students, along with representation technique.

Maintained course website.

Architectural Daylighting [Spring 2012]

Professor Davidson Norris

Teaches the fundamentals of passive solar lighting, techniques for measurement and control of daylight in buildings. Responsibilities include aiding professor in course preparation, audio/visual setup and general class operations.

Other Positions Held:

Exhibitions Staff [Spring 2013]

Slide Library Staff [Summer 2012]

Audio Visual Office Staff [Summer 2012]

UNIVERSITY OF KENTUCKY COD

Teaching Assistantships Held:

History and Theory of 20th Century and Contemporary Architecture [Fall 2008]

Professor Wallis Miller

Responsibilities include assisting in preparation of weekly lectures, leading weekly discussions, grading bi-weekly papers, working with students individually to develop writing skills, and presenting lecture on contemporary trends in architecture.

Other Positions Held:

S•Ky Blue Solar Decathlon Team [Fall 2008]

Professor Greg Luhan

Team Leader in Charge of Specifications and Envelope Design

Research and design work primarily focused on structural design, thermal efficiency, performance modeling and material surface effects of the building envelope.
